Use of this Document

The supplemental information contained in this package is designed to improve the readers' understanding of the financial performance of BMO Financial Group (the Bank). This information should be used in conjunction with the Bank's Third Quarter 2021 Report to Shareholders and the 2020 Annual Report.

Additional financial information is also available in the Q3 2021 Supplementary Regulatory Capital Information, Q3 2021 Investor Presentation as well as the Conference Call Webcast which can be accessed at our website at www.bmo.com/investorrelations.

This report is unaudited and all amounts are in millions of Canadian dollars, unless indicated otherwise.

Items indicated n.a. were not applicable.

Accounting Framework

We report our financial results under International Financial Reporting Standards (IFRS) as adopted by the International Accounting Standards Board (IASB). We use the terms IFRS and Generally Accepted Accounting Principles (GAAP) interchangeably.

Results and measures in both the Management's Discussion and Analysis (MD&A) and this document are presented on an IFRS basis. They are also presented on an adjusted basis that excludes the impact of certain items. Management assesses performance on both a GAAP basis and an adjusted basis and considers both bases to be useful in assessing underlying, ongoing business performance. Some metrics such as revenue, revenue growth, operating leverage and efficiency ratio have been presented based on revenue net of insurance claims, commissions and changes in policy benefit liabilities (CCPB). Users may find this presentation to be more useful as it reduces the variability in results associated with insurance. Insurance revenue can experience variability arising from fluctuations in fair value of insurance assets which are largely offset by the fair value changes of policy benefit liabilities reflected in CCPB. For additional discussion of CCPB, see the 2020 Annual Report. Adjusted results and measures are non-GAAP and are detailed in the Non-GAAP Measures section in the MD&A of the Bank's Third Quarter 2021 Report to Shareholders and 2020 Annual Report. For additional information about non-GAAP adjusted results and measures from prior periods included in this document, please refer to the applicable period's Report to Shareholders.

Securities regulators require that companies caution readers that earnings and other measures adjusted to a basis other than GAAP do not have standardized meanings under GAAP and are unlikely to be comparable to similar measures used by other companies.

Taxable Equivalent Basis

BMO analyzes consolidated revenues on a reported basis. However, like many banks, BMO analyzes revenue of operating groups and ratios computed using revenue on a taxable equivalent basis (teb). Revenue and the provision for income taxes are increased on tax-exempt securities to an equivalent before-tax basis to facilitate comparisons of income between taxable and tax-exempt sources. The effective income tax rate is also analyzed on a teb for consistency of approach. The offset to the group teb adjustments, mostly in BMO Capital Markets, is reflected in Corporate Services.

Changes

Periodically, certain business lines and units within business lines are transferred between client and corporate support groups to more closely align BMO's organizational structure with its strategic priorities. In addition, revenue, provision for credit losses and expense allocations are updated to better align with current experience. Results for prior periods are reclassified to conform to the current period's presentation.

The Bank adopted IFRS 16 Leases (IFRS 16), effective November 1, 2019 using the modified retrospective approach. Under IFRS 16, the bank recognized a right-of-use asset and a corresponding lease liability for leases. Prior periods have not been restated. Depreciation on the right-of-use asset has been recorded in non-interest expense, and accretion on the lease liability in interest expense. In prior years, the lease expense was recorded in non-interest expense. We allocate depreciation and interest expenses to operating groups. For further details on the impact of adoption of IFRS 16, refer to Note 1 of the Bank's First Quarter 2020 Report to Shareholders.

Effective the first quarter of 2021, we reclassified metal lease balances from other assets to business and government loans. Results for prior periods have been reclassified to conform with the current period's presentation.

(2) Region is based upon address of the property mortgaged.

(3) Portfolio insured mortgages are defined as mortgages that are individually or bulk insured through a credited insurer (i.e. CMHC, Genworth).

(4) Loan to Value (LTV) is based on the value of the property at mortgage origination and outstanding amount for mortgages, authorized amounts for HELOC's.

(5) HELOC in Canada includes 31% revolving (October 31, 2020 37%) and 69% amortizing (October 31, 2020 63%) loans.

(6) Remaining amortization is based upon current balance, interest rate, customer payment amount, and frequency in Canada and contractual payment schedule in the US.

(7) Large proportion of U.S. based mortgages in the longer amortization band largely driven by modification programs for troubled borrowers and regulator initiated mortgage refinance program.

- Pledged as collateral refers to the portion of on-balance sheet assets and other cash and securities that is pledged through repurchase agreements, securities lent, derivative contracts, minimum required deposits at central banks and requirements associated with participation in clearing houses and payment systems. Other encumbered assets include assets that are restricted for legal or other reasons, such as restricted cash and short sales.
- Other unencumbered assets include select liquid asset holdings that management believes are not readily available to support the Bank's liquidity requirements. These include securities held at the Bank's insurance subsidiary, significant equity investments, and certain investments held at our merchant banking business. Other unencumbered assets also include mortgages and loans that may be securitized to access secured funding.
- Loans included as available as collateral represent loans currently lodged at central banks that could potentially be used to access central bank funding. Loans available for pledging as collateral do not include other sources of additional liquidity that may be realized from the loan portfolio, such as incremental securitization, covered bond issuances and FHLB advances.
- Under IFRS, NHA mortgage-backed securities that include mortgages owned by the Bank as the underlying collateral are classified as loans. Unencumbered NHA mortgage-backed securities have liquidity value and are included as liquid assets under the Bank's Liquidity and Funding Management Framework. This amount is shown as a separate line item, NHA mortgage-backed securities.
- Liquidity Coverage Ratio (LCR) calculated based on the average of the daily LCR values during the quarter.
- Net Stable Funding Ratio (NSFR) calculated as the ratio between the amount of available stable funding and the amount of required stable funding.
